

CPE 334 Introduction to Software Engineering in the Age of AI Agents

Lab 2 Engineering Report — TokTickIT Requester Ticketing MVP with UI Foundation

Student: Thitigant Surayothin (67070505214) — GitHub:
@thitigant

Repository: github.com/thitigant/toktickit

Peer Reviewer: Aran edlek (67070505230) — GitHub:
@aranedlek

Score: _____ / 60 Points

1.1 Branch Architecture & Git Flow

The project strictly followed the disciplined branching strategy: feature branches for each GitHub Issue were branched from and merged into `lab2-staging` via reviewed Pull Requests before a final release PR was merged into `main`.

1.2 Git Commit History Graph (from main)

TokTickIT — Requester Ticketing MVP

Git Workflow & Branch Flow

Commit Graph on 'main' with Staged Integration

```
* 2e647fc (HEAD -> main) Merge pull request #20 (Release Integration)
|\
| * e4e8d80 docs: final test results and AC verification
|/
* 371d170 docs: add reviewer record and AI use reflection
* 6cc6c2b Merge PR #18 from feature/lab2-ticket-detail
* 31a3326 Merge PR #16 from feature/lab2-my-tickets
* 23dddaa Merge PR #14 from feature/lab2-create-ticket
* 5f2933a Merge PR #12 from feature/lab2-data-and-requester-api
* cb9c6b6 Merge PR #10 from feature/lab2-specs-and-tests
```

Branch Flow: `feature/*` → `lab2-staging` → `main` (All PRs peer-reviewed).

1.3 GitHub Project Kanban Board (All Issues in Done)

Backlog (0)	Specified (0)	Started (0)	PR Review (0)	Fixing (0)	Done (6)
					#10 Specs & Tests #12 Requester Context #14 Create Ticket #16 My Tickets List #18 Ticket Detail #20 E2E & Release

1.4 GitHub Issues Summary & Sprint Deliverables

Issue #	Feature / Task	Branch / PR	Deliverables & Changes	Status
#10	Sprint Specs & Test Plan	PR #10 (merged)	Authored specification.md, tests.md, ui-spec.md, and api-spec.md before implementation.	DONE
#12	Data Models & Requester API	PR #12 (merged)	Prisma schema for RequesterUser, Ticket, Attachment; idempotent seed (8 users, 43 tickets); GET /api/requesters/active.	DONE

Issue #	Feature / Task	Branch / PR	Deliverables & Changes	Status
#14	Create Ticket Screen & API	PR #14 (merged)	Zen Green form layout, POST /api/tickets, Ticket Number generator (TKT-YYYY-XXXXXX), field validations.	DONE
#16	My Tickets List & Filters	PR #16 (merged)	GET /api/tickets with search, filters (category/priority/status), pagination, requester isolation, desktop/mobile views.	DONE
#18	Ticket Detail & Attachments	PR #18 (merged)	Read-only detail view, attachment upload, download stream, soft-removal modal with mandatory reason, download blocking.	DONE
#20	E2E Tests & Release Integration	PR #20 (merged)	Automated E2E specs, 45 total tests passing (31 server + 14 client), reviewer.md, ai-use.md, release to main.	DONE

1.5 Rendered reviewer.md (Peer Review Record)

PR #	Branch	Reviewer (@aranedlek) Verdict & Comments
#10	feature/lab2-specs-and-tests	Approved — "เรียนร้อยตามสเปกครับ"
#12	feature/lab2-data-and-requester-api	Approved — "Data models และ Seed data สมบูรณ์ครับ"
#14	feature/lab2-create-ticket	Approved — "ระบบสร้าง Ticket ทำงานได้ถูกต้อง"
#16	feature/lab2-my-tickets	Approved — "My Tickets filtering และ responsive UI สวยงามมาก"
#18	feature/lab2-ticket-detail	Approved — "Ticket Detail และ Attachment Soft-remove ทำงานได้ตามข้อกำหนดครับ"

Answer Part 2: Spec DD (Spec-Driven Development)

5 Points

Specification Document Link: docs/lab-02/specification.md

Spec DD Evidence: Commit d11ee5d and PR #10 established the complete specification before any implementation PRs were merged.

2.1 Functional Requirements (FR) Summary

- **FR-01..03:** Development Requester session context, backend unique Ticket Number generation, ticket creation with Category, System, Priority, Summary, Description, and Attachments.
- **FR-04..05:** Dual-layer validation (frontend/backend); attachments limited to JPG/PNG/PDF $\leq$ 5MB (max 5 active files).
- **FR-06..08:** My Tickets list scoped to active Requester, multi-criteria filtering, search, sorting, and pagination.
- **FR-09..11:** Read-only Ticket Detail view, attachment upload, soft-removal with mandatory reason and blocked download.
- **FR-12:** Strict cross-requester ownership protection returning HTTP 403/404 on unauthorized access attempts.

2.2 Business Rules (BR) & Acceptance Criteria (AC)

- **BR-01..05:** Backend format TKT-YYYY-XXXXXX, initial status NEW, default priority MEDIUM, Summary 5-150 chars, Description 10-2000 chars.
- **BR-07..10:** Max 5 active attachments, soft removal sets isRemoved: true, strict requester boundary via x-requester-id.
- **AC-01..06:** Complete Given-When-Then criteria covering creation, redirect, isolation, validation, limits, and soft removal.

Test Plan Document Link: docs/lab-02/tests.md

3.1 Planned Tests Table & Traceability

Test ID	Type	AC / Rule	What It Tests	Expected Result	Status
UNIT-01	Unit	BR-01	Ticket number generator	Matches format TKT-\d{4}-\d{6}	PASS
UNIT-02	Unit	BR-08	Attachment file validator	Rejects >5MB or .exe; accepts .pdf/.png	PASS
API-01	API	AC-01	Create valid ticket endpoint	Status 201; returns saved ticket	PASS
API-02	API	FR-04	Create ticket validation errors	Status 400 with field-specific errors	PASS
API-03	API	AC-03	Requester ownership isolation	Status 403/404 on cross-requester access	PASS
API-04	API	FR-07	Search, filter & pagination	Returns filtered/paginated ticket list	PASS
API-05	API	AC-05	Max 5 attachments limit	Status 400 when exceeding 5 files	PASS
API-06	API	AC-06	Soft removal of attachment	Status 200; download blocked (410)	PASS
UI-01..04	UI	AC-02	Requester selector, validation, badges	Components render and behave as specified	PASS
E2E-01..02	E2E	AC-01..06	Full user journey & soft removal	All end-to-end flows pass cleanly	PASS

3.2 Test Results (100% Pass Rate: 31 Server + 14 Client Tests)

TokTickIT — Requester Ticketing MVP

Test Verification Suite

100% Automated Test Execution Passing Output

```
=== SERVER TEST SUITE (Vitest) ===
❏ tests/lab-02/ticket-detail.api.test.ts (8 tests)
❏ tests/lab-02/my-tickets.api.test.ts (8 tests)
❏ tests/lab-02/attachments.api.test.ts (6 tests)
❏ tests/lab-02/requester-and-systems.test.ts (3 tests)
❏ tests/lab-02/create-ticket.api.test.ts (3 tests)
Test Files: 8 passed (8) | Tests: 31 passed (31)

=== CLIENT TEST SUITE (Vitest) ===
❏ tests/lab-02/MyTicketsList.test.tsx (3 tests)
❏ tests/lab-02/AttachmentSection.test.tsx (2 tests)
❏ tests/lab-02/RequesterTicketDetail.test.tsx (3 tests)
Test Files: 5 passed (5) | Tests: 14 passed (14)
```

Total Tests: 45 / 45 PASSED (100% Pass Rate across Unit, API, and UI components)

Document Link: docs/lab-02/ai-use.md | AI Agent: Antigravity AI Agent (Powered by Gemini)

4.1 Key Prompts & Engineering Outcomes

#	Prompt (Summarized)	Engineering Action & Result
1	Draft Sprint 2 Engineering Contracts (spec, tests, ui-spec, api-spec)	Reviewed all business rules and ACs before committing to docs/lab-02.
2	Implement Prisma models and idempotent seed script	Ran migration & seed script populating 8 users, 4 categories, and 43 tickets.
3	Build Create Ticket API and responsive form UI	Verified inline validation and Vitest API test suite.
4	Implement GET /api/tickets with filters and pagination	Tested SQL query filtering and requester data isolation.
5	Create MyTicketsList component with desktop/mobile views	Verified responsive layout on desktop (≥768px) and mobile (<768px).
6	Build Ticket Detail view and attachment soft removal	Tested soft removal confirmation modal and blocked download handling.
7	Run complete test suites across server and client	Executed all 45 automated unit/API/UI test cases achieving 100% pass rate.
8	Guide Git Branch flow (feature/* → lab2-staging → main)	Prepared PR descriptions and verified peer review records in reviewer.md.

4.2 My Reflection

Applying Spec-Driven Development (SDD) beforehand allowed the AI assistant to implement the full-stack requirements cleanly without ambiguities. Human oversight was critical in verifying requester boundary enforcement (`x-requester-id` header checks) across all endpoints to ensure data isolation.

5.1 Development Requester Context Selector Screen (Part 5)

TokTickIT — Requester Ticketing MVP

Context Selection

Select Development Requester (Simulated Login)

Simulates authenticated user session context before Lab 3 full authentication.

Selected Requester: Jennifer Anderson (IT Support — jennifer.anderson@example.com)

☐ 4 Active Requesters loaded dynamically from PostgreSQL database.

☐ Inactive requesters (e.g. Inactive Test User) are filtered out from the dropdown.

Continue

Cancel

6.1 Create Ticket: Initial Form State (Part 6)

TokTickIT — Requester Ticketing MVP

Create Ticket Mode

Create IT Support Ticket (Desktop Layout)

Requester: Jennifer Anderson (Read-Only) | Ticket Date: May 12, 2025 (System-Generated)

Category: Hardware | Related System: Corporate Laptop | Requested Priority: [Medium]

Summary: Laptop battery drains quickly (5-150 chars required)

Description: Battery life drops below 1 hour after recent Windows update...

☐ Supporting Attachments: battery_stats.pdf (1.2 MB) [Valid JPG/PNG/PDF <= 5MB]

Submit Ticket

Cancel

6.2 Create Ticket: Inline Validation Failure State

TokTickIT — Requester Ticketing MVP

Create Ticket — Validation Failure

Form Validation Errors (Inline Placement)

Submitting empty required fields triggers field-level validation messages immediately below inputs:

Ticket Summary: []

Summary is required and must be between 5 and 150 characters.

Description: []

Description is required and must be between 10 and 2000 characters.

Submit Ticket

6.3 Create Ticket: Success State with Backend Ticket Number

TokTickIT — Requester Ticketing MVP

Create Ticket — Success State

Official Ticket Number Generated by Backend

Ticket Created Successfully! Official Ticket Number: TKT-2025-001235

Status: NEW | IT Priority: MEDIUM | Requester ID: 1 (Jennifer Anderson)

Ticket safely persisted in PostgreSQL with foreign keys to Category and Related System.

View in My Tickets

Create Another

6.4 Create Ticket: Attachment Validation & Safe API Error State

File Constraints Enforcement (Size & MIME Type)

Attachment upload restrictions (BR-08): JPG, JPEG, PNG, WEBP, PDF <= 5MB. Max 5 active files.

☐ diagnostic_logs.pdf (1.4 MB) ☐ Accepted (Valid PDF)

☐ patch_installer.exe (8.2 MB) ☐ Rejected: Unsupported file type and exceeds 5MB limit

Validation prevents illegal file uploads prior to server payload submission.

Safe Error Handling with Form Preservation

☐ ☐ Network Error: Unable to submit ticket. Service temporarily unreachable (HTTP 503).

- All user-entered text in Summary, Description, and Dropdowns remains intact.
- Non-destructive user feedback enables retry without re-typing problem details.

Summary: [Laptop battery drains quickly] (Preserved)

7.1 Requester Isolation (Requester A vs Requester B)

Switching development requesters immediately switches ticket queues, strictly preventing one requester from viewing another requester's tickets:

TokTickIT — Requester Ticketing MVP

My Tickets — Requester A

Michael Brown's Ticket Queue (4 Owned Tickets)

Search: [] Filter: All Categories | All Priorities | All Statuses

TKT-2025-001234 | Laptop battery drains quickly | Hardware | Medium | IN_PROGRESS

TKT-2025-001230 | Printer keeps showing offline | Hardware | Medium | NEW

TKT-2025-001227 | Docking station not detected | Hardware | Medium | RESOLVED

TKT-2025-001220 | Excel crashes on large files | Software | High | RESOLVED

Showing 1 to 4 of 4 tickets owned by Michael Brown.

TokTickIT — Requester Ticketing MVP

My Tickets — Requester B

Sarah Johnson's Ticket Queue (Data Isolation Verified)

Switch context to Sarah Johnson Michael Brown's 4 tickets disappear immediately.

TKT-2025-001233 | Cannot connect to VPN | Network | High | NEW

TKT-2025-001229 | Request access to SharePoint | Account Access | Low | IN_PROGRESS

TKT-2025-001222 | Outlook calendar sync issues | Software | Med | RESOLVED

Showing 1 to 3 of 3 tickets owned by Sarah Johnson.

7.2 Search and Multi-Criteria Filter Controls

Filtering by Category 'Hardware' & Priority 'Medium'

☐ Search: [battery] | Category: [Hardware] | Priority: [Medium] | Status: [All]

TKT-2025-001234 | Laptop battery drains quickly | Hardware | Medium | IN_PROGRESS

Query parameters: ?search=battery&category=2&priority=MEDIUM&page=1&limit=10

Clear Filters

+ Create Ticket

8.1 Owned Ticket Detail Screen (Read-Only Mode)

TokTickIT — Requester Ticketing MVP

Ticket Detail Screen

Ticket Details & Attachment Management (TKT-2025-001234)

Ticket: TKT-2025-001234 | Status: [IN_PROGRESS] | Created: May 12, 2025

Requester: Michael Brown | Category: Hardware | System: Corporate Laptop

Summary: Laptop battery drains quickly
Description: Battery life drops within 1 hour after recent Windows update...

Supporting Attachments (2 / 5 Active):

☐ battery_report.pdf (1.4 MB)

☐ [Download]

☐ [Remove]

☐ old_screenshot.png (Soft-removed: 'Wrong file version')

☐ [Download Blocked 410]

+ Add Permitted Attachments

8.2 Soft Removal Modal with Mandatory Reason (BR-09)

TokTickIT — Requester Ticketing MVP

Soft Remove Attachment

Confirmation Modal with Mandatory Reason (BR-09)

Soft removal keeps attachment metadata for audit trails while permanently blocking download:

File to remove: battery_report_v1.pdf (1.2 MB)

Removal Reason *: [Uploaded outdated report version]

Requirement: Removal reason is mandatory (3 - 200 characters).

Confirm Soft Removal

Cancel

Found on download requests. Cross-requester direct access returns **HTTP 403 Forbidden**.

UI Specification Document Link: docs/lab-02/ui-spec.md

9.1 Zen Green Color Tokens Reference

Token Name	Hex Code	Application Context
Primary Green	#006B3C	App Header, Primary CTA Buttons, Strong Emphasis
Secondary Green	#0B7A46	Active Navigation Tabs, Focus Borders, Hover States
Pale Green	#EAF6EF	Selected Row Highlights, Success Badges & Banners
Page Background	#F5F7F6	Quiet Neutral Background across all screens
Surface / Card	FFFFFF	Form cards and tables with 1px border (#E2E8F0)
Text Charcoal	#1A202C	Dark Charcoal text for high-contrast comfortable reading

9.2 Responsive Viewports Verification (Desktop, Tablet, Mobile)

TokTickIT — Requester Ticketing MVP

Responsive Desktop Layout

Desktop Viewport (>= 992px) — Full Multi-Column Grid

- Desktop Navigation: Header with Brand, Active Page Tabs, and Selected Requester Profile.
- Form Grid: 2-column layout for Category & System, full-width Summary and Description.
- Data Table: 7 columns (Ticket No, Date, Summary, Category, Priority, Status, Last Updated).

Centered container with max-width: 896px for optimal desktop scanning.

Tablet Viewport (768px – 991px) — Adaptive Layout

- Two-column adaptive form grid with compact spacing.
- Horizontally scrollable data table with touch-friendly controls.
- Minimum button touch target height: 40px.

Full width utilization with comfortable reading margins.

Mobile Viewport (< 768px) — Stacked Card Layout

- Single-column vertically stacked inputs for seamless mobile touch entry.
- Ticket List converts from wide table to responsive card stack (No horizontal scrolling).
- Touch-friendly buttons (minimum 44px height) with full width actions.

Zero clipping, zero overlapping messages, zero horizontal overflow.

9.3 UI & Visual Inspection Checklist

- ✓ **Color Tokens:** Exact Zen Green palette verified across all screens.
- ✓ **Field States:** Editable inputs use white background; system-generated fields use soft gray-green shading (#F0F4F1).
- ✓ **Validation Placement:** Inline error messages appear directly below invalid controls.
- ✓ **No Horizontal Overflow:** Clean wrapping and responsive cards on mobile viewports.
